

## TUTORLEDGER

# The practical guide to running your tuition smoothly

A simple step-by-step handbook for private tutors and coaching centres

## Teach more. Manage less.

Students • Fees • Attendance • Receipts • Reports • Backup

### What TutorLedger helps you do

- Keep every student, class and fee record in one place.
- Know exactly who has paid, who is pending and what needs follow-up.
- Record attendance quickly for an entire batch or individual students.
- Create shareable payment receipts and send polite WhatsApp reminders.
- Protect your work with local and Google Drive backup options.

**The result:** Less time searching registers and calculating fees. More time teaching your students.

### Start here: your first 10 minutes

1. **Open Settings** - Add your academy name, tutor name, contact number and UPI ID. These details appear in receipts and reminders.
2. **Create your first batch** - Set the default monthly fee and class schedule.
3. **Add your students** - Choose their batch, enter the parent mobile number and add a custom fee only when it differs from the batch fee.
4. **Check the Dashboard** - Use it each day to see dues, collections and quick actions.

## The simple daily workflow

TutorLedger works best when you follow the same short routine each day and each month.

| When                    | Do this                                                            | Benefit                                                 |
|-------------------------|--------------------------------------------------------------------|---------------------------------------------------------|
| <b>Before class</b>     | Open Attendance, choose the batch and date.                        | You start each class with an accurate register.         |
| <b>After class</b>      | Mark everyone present, then change only absences or late students. | Attendance takes seconds instead of calling every name. |
| <b>When fees arrive</b> | Open the student or Dashboard, select Pay, then save the receipt.  | Every payment has a clear record.                       |
| <b>Once a week</b>      | Review pending fees and send WhatsApp reminders.                   | Follow-up stays polite and consistent.                  |
| <b>At month-end</b>     | Use Analytics to review collection and export reports.             | You can understand your tuition income quickly.         |

### Before you begin

- Use one batch for students who share the same fee and schedule.
- For a small mixed group, one batch is still fine: set a custom fee for the few students who pay a different amount.
- Keep the parent mobile number accurate. It is used for WhatsApp payment reminders.
- Use the same month cycle throughout the app so collections and pending dues stay easy to read.

**Important:** TutorLedger keeps your information on your phone first. Backup protects that work if you change or lose a phone.

# 1. Create batches and classes

Set up your teaching groups once, then let TutorLedger apply the right fee and schedule to each student.

**Create New Batch**  
Configure curriculum subject, default fee rate, and weekly schedule

Batch / Class Name \*  
e.g. Class 10 - ICSE Board Batch A

Subject  
e.g. Mathematics, Physics

Default Monthly Fee (₹) \*  
₹ 1000

Schedule Days  
☒ Mon ☐ Tue ☒ Wed ☐ Thu ☒ Fri ☐ Sat  
☐ Sun

Time Slot / Hours  
 ⌚ e.g. 5:00 PM - 6:30 PM

Cancel

## How to use it

5. **Go to Batches** - Tap Batches in the bottom navigation.
6. **Create a new batch** - Use Create New Batch and enter the class or batch name.
7. **Set the default fee** - Enter the monthly fee shared by most students in that batch.
8. **Add the schedule** - Choose teaching days, subject and time slot if you want these details visible in the class record.

**Why it helps:** You do not need to enter the same monthly fee repeatedly for every student. The batch fee becomes the default automatically.

**Pro tip:** Example: Create "Class 10 Mathematics" at Rs 1,000 per month. If one student pays Rs 800, set only that student's custom fee during enrolment.

## 2. Register and manage students

*Keep a complete student profile, parent contact and fee arrangement in a single place.*

**Onboard New Student** ✕

Class 10 CBSE, 12 Physics, IIT-JEE Foundation & more

Rahul Kumar

Assigned Batch / Class \*

Class 10 (Default ₹1,000/mo) ▼

Parent / Guardian Name (Optional)

Rajesh Kumar

Parent Mobile Number \*

+91 9875632418

Used for WhatsApp billing reminders

Student Mobile (Optional)

+91 Direct number

For direct student coordination

Joining Date \*

09/02/2026 ▼

Custom Fee Override (Optional)

₹ Leave blank to use ₹1000

**Prorate First-Month Fee** ☐

Calculates fee proportionally based on remaining days from joining date.

Internal Notes / Academic Target (Optional)

e.g. Target 95% in Board exams, needs extra practice on Calculus

### How to use it

9. **Open Students** - Tap Students, then choose Add Entry / New Student. You can also start from the Dashboard.
10. **Enter the essentials** - Add the student name, choose the batch and enter the parent mobile number. The parent number is required for fee reminders.
11. **Choose the fee** - Keep the batch default fee or add a custom amount for that individual student.
12. **Save and review** - Tap any student later to see payment history, attendance and receipts in one profile.

**Why it helps:** You can find a student quickly by name, parent phone number or batch instead of looking through a paper register.

**Pro tip:** When a student changes class or batch, edit the profile. Keep historic payments in the same profile rather than creating duplicates.

### 3. Track fees, payments and receipts

See overdue amounts clearly, record payment correctly and create a receipt as soon as money is received.

#### How to use it

13. **Find the due amount** - From Dashboard or a student profile, tap Pay next to the current month's dues.
14. **Enter the payment** - Choose the amount, payment mode (UPI, cash or bank transfer), date and optional transaction reference.
15. **Handle special cases** - Use partial payment when the family pays in instalments. Use the waiver / discount field only for a genuine concession.
16. **Confirm and generate** - Save the payment. TutorLedger creates a receipt record you can open or share later.

**Why it helps:** You no longer need to remember whether a family paid in cash, UPI or part-payment. The student ledger keeps the history for you.

**Pro tip:** For an overpayment, check the advance amount shown in the payment screen. It can remain as credit for a future month.

## 4. Mark attendance quickly

*Take a reliable attendance register without slowing down your class.*

### How to use it

17. **Open Attendance** - Tap Attendance in the bottom navigation.
18. **Choose batch and date** - Select the class you are teaching and confirm the attendance date.
19. **Use Mark All Present** - For a normal class, mark the full batch present with one tap.
20. **Correct exceptions** - Change only the students who were absent or late, then save the register.

**Why it helps:** A fast daily record makes it easier to discuss progress with parents and notice students who are missing classes.

**Pro tip:** If you take attendance after the class, choose the exact class date first so your history remains correct.

## 5. Send WhatsApp fee reminders

Follow up on pending fees with a consistent and respectful message instead of typing the same text every time.

### How to use it

21. **Review pending dues** - Use the Dashboard, Students list or Analytics to identify students with pending fees.
22. **Tap the WhatsApp reminder action** - TutorLedger prepares a reminder using the parent number stored in the student profile.
23. **Check before sending** - Review the message, fee amount and month in WhatsApp before you send it.
24. **Keep your contact details current** - Set your UPI ID and receipt footer note in Settings so parents know how to pay and whom to contact.

**Why it helps:** A clear reminder saves awkward follow-ups and helps parents act before the due amount is forgotten.

**Pro tip:** Use reminders after you have checked that the payment has not already been received in cash or another account.

## 6. Understand your business with Analytics

Turn your fee records into a clear monthly picture of collections, pending dues and payment methods.

### How to use it

25. **Open Analytics** - Tap Analytics in the bottom navigation.
26. **Review the selected month** - Check the collection rate, collected amount, outstanding fees and payment split.
27. **Review the pending list** - Use the list to decide who needs a reminder or a personal follow-up.
28. **Export a report** - Use Export Report when you need an Excel or PDF copy for your records.

**Why it helps:** Instead of adding amounts on a calculator, you can see whether your tuition business is on track in one screen.

**Pro tip:** At the end of each month, save one PDF or Excel report in a folder named by month. It makes year-end accounting much easier.

## 7. Protect your data with Backup

*Keep a safe copy of your student, payment and attendance records so a phone problem does not become a business problem.*

### How to use it

29. **Open Backup** - Tap the cloud Backup button in the top bar or open the Backup tile on the Dashboard.
30. **Connect Google Drive** - Open Settings and connect the Google account you want to use. Wait while TutorLedger checks the Drive backup status.
31. **Choose your backup source** - If you already have a Drive backup, carefully choose whether to restore it or keep this phone's current data.
32. **Keep a local copy too** - Use Local backup to export a JSON file and store it in a safe folder, Google Drive or another trusted location.

**Why it helps:** Google Drive backup gives you recovery options when you replace a phone. A local export is an additional independent safety copy.

**Pro tip:** Do not restore a backup until you read the summary. Restoring replaces data currently on this phone. Make a local export first when you are unsure.

## Premium, account connection and support

TutorLedger uses your Google account for Google Drive backup and, when applicable, Premium recovery. Your teaching data remains separate from your Gmail account.

### Free plan and Premium

- The Free plan supports up to 30 active students. The core app features remain available.
- Lifetime Premium removes the active-student limit. Premium is tied to the Google account used for the purchase.
- If you change phones, connect the same Google account and use the Premium section only when you need to restore Premium on the new device.

### Good habits for a smooth system

- Record every payment on the same day you receive it.
- Mark attendance after each class, not at the end of the week.
- Send reminders only after checking the current payment status.
- Create a local backup before changing phones or restoring older data.
- Keep the phone locked and do not share access with people who should not see student information.

**Need help?** Keep a screenshot of the screen you are on and contact your TutorLedger provider. A screenshot makes it much faster to understand the issue and help you.

## Quick reference

| I want to...                         | Open this area                              |
|--------------------------------------|---------------------------------------------|
| <b>Add a new student</b>             | Students > Add Entry / New Student          |
| <b>Record a payment</b>              | Dashboard or Student Profile > Pay          |
| <b>Check pending fees</b>            | Dashboard, Students or Analytics            |
| <b>Take attendance</b>               | Attendance > Select Batch and Date          |
| <b>Send a reminder</b>               | Student row / pending fee action > WhatsApp |
| <b>Download report</b>               | Analytics > Export Report                   |
| <b>Save or restore data</b>          | Top bar Backup > Local or Google Drive      |
| <b>Change UPI / business details</b> | Settings                                    |

**TutorLedger - your tuition business, in one place.**
